Department of Agronomy

WISCONSIN WINTER WHEAT EVALUATION PROGRAM

Eligibility of Entrants

Any producer or breeder of winter wheat seed is eligible to enter this test. Each application for the entry of a variety or brand will be based on the name under which the variety or brand is marketed. A variety or brand may be entered only once at each location. Released public varieties and university experimental lines will be entered by the Evaluation Program.

Seed Treatment

The use of a fungicide and/or insecticide seed treatment is allowed if that is how the seed is typically marketed and if the seed treatment used can be noted on the report. All treated seed must be identified by product label. Fungicide treated seed is preferred, but untreated seed will be accepted.

Rejection

Applications may be rejected if information is not complete, or the entry fee is not paid.

Locations

Tests are conducted at four or more Wisconsin locations. The anticipated locations for the 2009 tests are Arlington, Janesville, Lancaster and Chilton.

Data Recorded

Yield, plant height, lodging, and test weight will be recorded at all sites. Winter survival and/or disease ratings will be recorded when winter damage or disease outbreak occurs.

Publication of Results

Each entrant will be furnished a report giving the specific performances as soon as the data from all locations are available. A final report will also be published and made available to the public via websites, newspapers and Extension bulletins. Entries not available for commercial sale next year may be accepted for testing and the data not published.

Entry Fee

\$480 per variety

Seed Amount

15 pounds per variety

Deadline and shipping information:

Send completed application forms, fee, and seed by Sept 1 to:

Wisconsin Winter Wheat Evaluation Program
UW-Madison Agronomy Dept.
